Installation

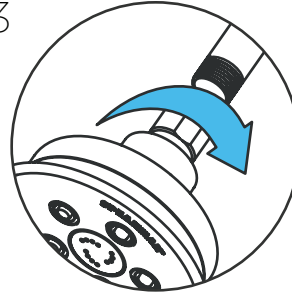

We engineer our shower heads to install within minutes of being removed from the box. Allowing you to spend less time working, and more time enjoying your shower.

1

Remove old shower head

3

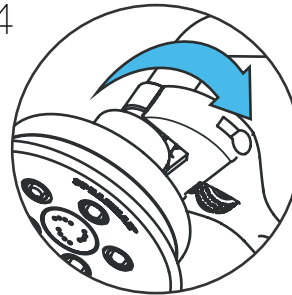

Rotate shower head clockwise onto shower arm

2

Wrap plumber's tape clockwise around shower arm

4

Tighten with wrench if necessary.
Use washcloth to avoid scratching of finish.

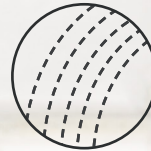

Anystream

With Anystream technology, you can effortlessly adjust your shower head's spray settings to produce a pattern that's perfect for you. All it takes is a simple rotation of your fixture's Anystream mechanism.

INTENSE

A powerful, full-coverage barrage of fine, precise sprays that will jolt you awake in the morning.

RAIN

A drenching, gentle rinse engineered to perfection to deliver a relaxing, sensual experience.

FLOOD

Heaving, soaking waves designed to drench every inch of your existence. Just lower your head and lose yourself completely.

INTENSE

A powerful, full-coverage barrage of fine, precise sprays that will jolt you awake in the morning.

MASSAGE

Pulsating. Pounding. Perfection. The massage setting is a powerful, concentrated blast of water that is ideal for kneading sore or tight muscles.

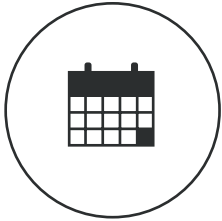

COMBINATION

The best of both worlds. The combination setting pairs the intense and massage setting together into one complete experience.

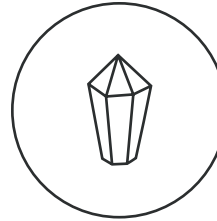

Clean & Care

We design our fixtures to deliver water perfectly for an exceptional amount of time. By following a few simple steps, you can ensure your shower head looks and performs exactly as it's intended.

PERIODIC CLEANING

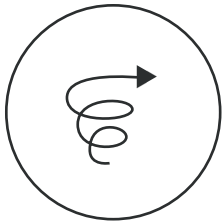

Mild soap and warm water will help keep your shower head in its original condition. For best results, dry immediately with a soft cloth.

MINERAL DEPOSITS

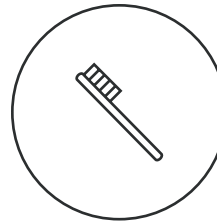

Soak your shower head in a solution of one part water and two parts vinegar for an hour to break up any mineral deposits.

NOTE: Only to be used on chrome shower heads

SELF CLEANING

With the water on, rotate through all of your shower head's spray settings to allow each nozzle to self rinse itself clean.

SPRAY CONSISTENCY

With a soft-bristled toothbrush, gently scrub each and every plunger to ensure water flows freely through your shower head.
